

Mumbai Metro III – an underground marvel..!

Mumbai's only underground Metro Line 3 (Colaba-Bandra-Seepz) achieved its sixth milestone on Wednesday with the tunnel boring machine, Tapi 1, completing 592 metres tunnelling work at Sahar Road metro station. The Tunnel Boring Machine (TBM) had started the work on September 13. Sahar Road and several other areas are not well connected with any other transportation system. Metro 3 will give commuters an easy access to the area, which has several developed business centres, finds our photographer **TRUPTI AREKAR**.
