

Colaba-Bandra-SEEPZ Metro-3 corridor

Bidders line up to design tunnel ventilation and environmental control system

Mumbai, March 18, 2017: The Mumbai Metro Rail Corporation (MMRC) has taken another step to fast-track the procurement of system components by conducting pre-bid meeting with all pre-qualified bidders for the “Design, Manufacture, Supply, Installation, Testing and Commissioning of Tunnel Ventilation & Environmental Control System.”

The meeting was attended by representatives of renowned companies including M/s. Bluestar & C Doctor Consortium, M/s. ETA Engineering Pvt. Ltd, M/s. Isolux Ingenieria S. A., M/s. Sterling & Wilson-GYT Consortium & M/s. Voltas-STEC Consortium.

Tunnel ventilation & Air conditioning of stations is a critical part of the fully underground project. The meeting was organized to clarify the techno-commercial issues to bidders and to facilitate them for better understanding and clarity for participating in the competitive bidding process.

During the meeting, necessary clarifications pertaining to the tunnel ventilation system, air conditioning in station areas, smoke extraction strategy, comprehensive maintenance and integration of SCADA System with other system packages to ensure safety of patrons etc. were discussed.

Executive Director MMRC, Mr. R. K. Sharma said, “We have received an overwhelming response to the pre-bid meeting and are extremely happy about it. Our fully underground and Air-conditioned Metro Project will provide a safe and convenient journey to the Mumbaiikars”.

The last date for submission of Bid Documents for this work is May 8, 2017 (1500 Hrs.).
