

Rubber sheet laid to prevent leakage of Mithi River into Metro-3 line

A mushroom gasket, a rubber sheet embedded between two layers of concrete, has been laid along a 242-meter stretch to prevent the Mithi River from leaking into the Colaba-Bandra-Seepz Metro-3 line's underground tunnel. Officials said that in the event that water from the river comes into contact with the gasket, it will inflate into the shape of a mushroom and prevent leakage
