

Colaba-Bandra-SEEPZ Metro-3 Corridor

39th Breakthrough at Mahalaxmi Metro Station

Mumbai, July 21, 2021 – Mumbai Metro Rail Corporation (MMRC), achieved its 39th breakthrough at Mahalaxmi Metro Station on the Colaba-Bandra-SEEPZ Metro-3 corridor. Robbins made TBM Tansa-2 completed its upline drive of 1117.5 meters from Science Museum Metro Station to Mahalaxmi Metro Station in 257 days using 745 concrete rings.

“This was indeed a challenging task as this particular stretch encompasses tunnelling below the buildings that are more than 80 years old and live western railway track between Mahalaxmi and Lower Parel Station. Our team has accomplished this tough task efficiently”, said Mr. Ranjit Singh Deol, Managing Director, MMRC.

Package-3, which includes Mumbai Central, Mahalaxmi, Science Museum, Acharya Atre Chowk and Worli Metro stations, is the longest stretch of the corridor and has now witnessed total three breakthroughs - (Science Museum to Worli) (Upline–2072m and Downline–2057m) and (Science Museum to Mahalaxmi) (Upline–1117.5m).

The overall tunnelling completed on the corridor is 52.6-km which is approximately 96.5% of the total project. (Ends)
