

Another metro shaft to come up opp Eros

TIMES NEWS NETWORK

Mumbai: Mumbai Metro Rail Corporation (MMRC), which is executing the Colaba-Bandra-Seepz underground corridor, has decided to build another shaft on the traffic island opposite Eros cinema.

The shaft was not originally planned but it is being made now to remove muck for the TBMC in operation from Cuffe Parade to CSMT.

MMRC's director (projects) S K Gupta said, "This shaft is necessitated to make up for the time lost due to litigations, including one related to tree issues to the extent possible."

Civic activists are upset with the plan as it will impact eight trees which are standing on the traffic island.

Gupta said, "Timely completion of the project is very important for the interest of Mumbaikars and all efforts are being made by us to limit the impact of such litigation on the project."
