

BRIDGE OVER UNDERGROUND METRO STN

Mumbai Metro Rail Corporation on Monday opened a temporary deck bridge above the Metro III station that is being dug under Marol-Maroshi Road. The 120m long and 9m wide bridge has been erected to allow traffic movement, without affecting the Metro work. It also has a 1.5m wide pedestrian walkway. "The bridge is slightly elevated so there will be no waterlogging during monsoon," said an MMRC spokesperson
